

Mountain West Vintage Trials Association
Tech Inspection Guidelines
February 2013

Mt. West Vintage Trials Assoc. holds tech inspections for every event. Motorcycles are checked for safety and to ensure the requirements are met for the class entered.

Safety inspection will include:

- Chain sprockets
- Cables
- Kill switch or button
- Throttle – works easily & returns on its own
- Brakes – work easily
- Ball ends on levers
- Any sharp or exposed broken parts
- Spark arrestor – for locations that require use of a spark arrestor
- Bar ends – recommended

Bike Class inspection will include:

- Twin Shock classes
 - Air cooled
 - Twin shocks
 - Drum brakes
 - Cable operated controls
- Historic Single Shock
 - Air Cooled
 - Mono shock
 - Drum and/or single piston brakes
 - Cable operated clutch

MWVTA also offers a modern support class for bikes that don't meet the requirements for the other classes.

Any modifications made to a bike must be done in the spirit of the class you intend to ride it in. If you are not sure which class your bike qualifies for, feel free to contact Chuck, or MWVTA through the "[Contact Us](#)" form listed in the "About MWVTA" menu. Detailed information about bikes & class requirements can also be found in the rules linked on the "[Membership & Rules](#)" page.
